

Cellhire's push e-mail service utilizes international BlackBerry Handheld Devices which also feature voice and SMS capability. The BlackBerry is a compact, all-in-one unit featuring a full color screen, backlit QWERTY keyboard and intuitive menu system. It is also tri-band and capable of roaming on GPRS networks throughout 50 countries, including the US.

Customers may use their own corporate BlackBerry Enterprise Server for access to their own e-mail (please consult with your IT department) or opt for a personalized e-mail address hosted on Cellhire's NetMobile platform. Unlimited e-mail with attachments is delivered direct to the BlackBerry unit in the US or while roaming abroad for a single all-inclusive rental charge.

Services

Business and Personal E-Mail Access Anywhere in the World

Whether it be a POP3 account (Hotmail, Yahoo, Google, etc.) or your business e-mail (johndoe@yourbusiness.com) Cellhire will add each account to a single Blackberry device (up to ten accounts!), meaning customers need never miss another important e-mail. BlackBerry utilizes 'always on' technology, automatically pushing e-mail to the palm of your hand.

Follow Me

Add Follow Me to your International BlackBerry rental and keep your own mobile number for all voice applications. You simply forward your mobile number to a Cellhire Follow Me number and start saving the moment you arrive at your travel destination.
