

Cellhire's Follow Me solution enables you to use your own US mobile number and avoid expensive roaming charges on all calls. Simply forward* your existing mobile number to a Cellhire Follow Me number before you depart and start saving as soon as you reach your travel destination.

What are the benefits:

- keep your existing mobile number
- local airtime when traveling abroad
- avoid expensive international roaming charges
- enjoy savings on incoming, national and international calls
- no contract – rent for the time you are traveling
- 24 hour global support

This solution offers you multiple options for controlling your call spend - you can determine who pays for your calls! Every Follow Me rental comes with your own exclusive Cellhire toll-free number and an international local airtime number giving you the following options:

Option 1 : Forward your US mobile number to your Cellhire assigned toll-free number. Your business associates, friends and family don't even need to know you're out of the country; they dial your US mobile phone and are connected to you regardless of your travel destination. You will incur a deduction from your domestic minute plan and a small per minute charge on your Cellhire bill for the incoming calls.

Option 2 : Because there is a charge for incoming calls with the Follow Me solution, you may not want every call to your US mobile phone forwarded to your Cellhire international number, yet you still want to be reached without having the caller incur the cost of an international call. If you prefer this option, rather than forwarding your number you simply give the toll-free number to those who will need to reach you.

Option 3 : There will be times when you want to be reached but don't want to pay for the incoming call. Give these individuals the Cellhire international number rather than the toll-free number. Callers needing to reach you will incur the call cost while you will enjoy FREE incoming calls.

*Simple step-by-step instructions will be included with your order.
